Rafal's Short Biography (126 words, 887 characters)

As Data Scientist at Project Botticelli Ltd (projectbotticelli.com), Rafal focuses on making advanced analytics easy and useful for his clients. He can help you find valuable, meaningful patterns and statistically valid correlations using data mining and machine learning, and he is also known for his work in business intelligence, data protection, enterprise architecture, and solution delivery. Rafal has been a popular speaker at major IT conferences since 1998, and he had the honour of sharing keynote platforms with Bill Gates and Neil Armstrong. A natural educator, he explains complex concepts in simple terms in his enjoyably energetic style. Outside IT, Rafal spends a quarter of every year finding abstractions in natural landscapes, expressing them through traditional, black-and-white, large-format film photography, making silver-gelatin prints by hand—see rafal.net.

Rafal's Longer Biography (225 words, 1509 characters)

As Data Scientist at Project Botticelli Ltd (projectbotticelli.com), Rafal focuses on making advanced analytics easy and useful for his clients.

He can help you find valuable, meaningful patterns and statistically valid correlations using data mining and machine learning in data sets both big and small. Rafal is also known for his work in business intelligence, data protection, enterprise architecture, and solution delivery. While majority of his clients come from consumer and corporate finance, entertainment, healthcare, IT, retail, and the public sectors, Rafal has worked in almost all industries.

Rafal has been a popular speaker at major IT conferences since 1998, and he had the honour of sharing keynote platforms with Bill Gates and Neil Armstrong. A natural educator, he explains complex concepts in simple terms in his enjoyably energetic style.

Rafal was born in Poland. He left it in 1990 to study computing in United Kingdom, where he earned BEng in Computing Science, followed by MSc in Foundations of Advanced Information Technology, at [Imperial College](http://imperial.ac.uk), University of London. His studies were sponsored by [Oxford Computer Group Ltd](http://oxfordcomputer.com), where he later worked as a developer, trainer, and a consultant. Since 2000 he has worked for [Project Botticelli Ltd](http://projectbotticelli.com).

Outside IT, Rafal spends a quarter of every year finding abstractions in natural landscapes, expressing them through traditional, black-and-white, large-format film photography, making silver-gelatin prints by hand—see rafal.net.
